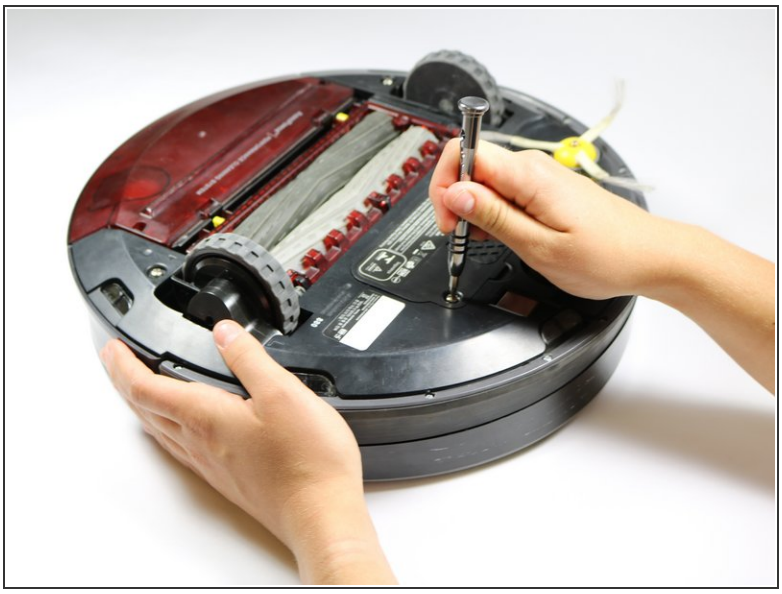
Step 1 — Battery



- Start with your Roomba upside down, with the wheels facing up.
- Using a JIS driver in #1 size remove the two 15mm screws holding the battery cover in place.

Step 2

- Remove the battery cover and place it off to the side.

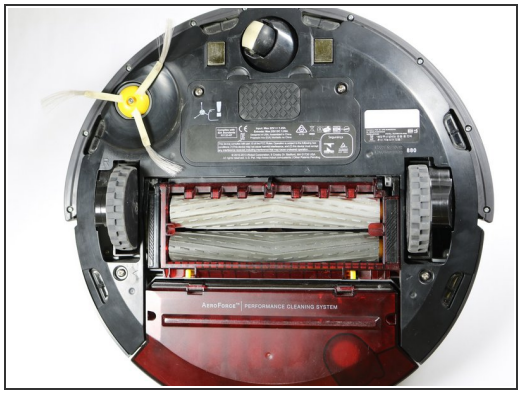
Step 3

- Remove the battery using the green tabs on either side of the battery.

Step 4 — Side Wheels



- Loosen the side brush screw with a screwdriver.
- Remove the side brush

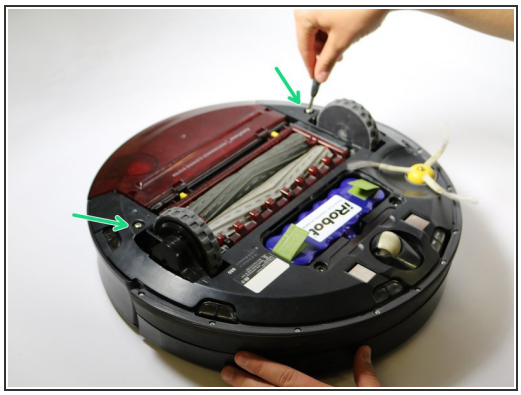
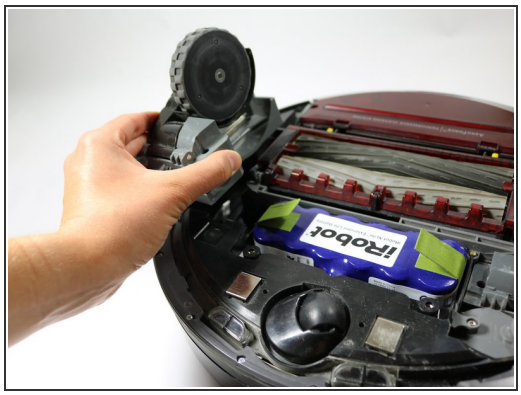
Step 5





- Loosen the single screws that retains the side wheel to the Roomba.
- Remove cover over the wheel that was held in place by the screws.
- Remove the wheel module.

To reassemble your device, follow these instructions in reverse order.
