

Planet Eclipse Geo3 Eyes Replacement

This guide will show how to replace the eyes...

Written By: Rett Triplett

INTRODUCTION

This guide will show how to replace the eyes and eye wire if either are damaged.

TOOLS:

Macro Bit Set (1)

5/64" Allen Wrench, 1/8" Allen Wrench

PARTS:

New eyes (1)

Step 1 — Grip

- Remove the four screws from the grip with the 5/64" allen wrench. There are two on each side.

Step 2

- Pull the grip away from the frame.

Step 3

- Pull the grip through the opening.
- The grip is connected in the middle and is one piece.

Step 4 — Macroline

- Remove the macroline from the fitting by pulling the metal ring around the end of the fitting away while pulling out the macroline.
 - ① *It helps to rotate the collar to create room to pull out macroline.*

Step 5

- While pulling in the metal ring on the fitting, pull the macroline out.

Step 6 — Body

- Use 1/8" allen wrench to remove screw behind regulator.

Step 7

- Use 1/8" allen wrench to loosen the screw inside the grip on the right side.
① *The screw only needs to be turned a couple of times.*
- Slide the upper frame forward on the rails and remove the screw from the slot to separate the two halves of the body.

⚠ BE CAREFUL: Do not pull the two frames apart too much or too quickly. This may cause the wires to be damaged.

Step 8 — Eyes

- Use a prying tool or [tweezers](#) to gently remove the connection from the board. It is the connection with 2 black and 2 red wires.
- Pull the wire through the opening.

Step 9

- Use 5/64" allen key to remove each screw from eye covers (Located on both sides of the paintball marker.)
- Pull off eye covers. (Located on both sides of the paintball marker.)

Step 10

- Gently pull out the two eyes, one on each side of the paintball marker.
 - ① *The red wire leading to the eye on the right side of the paintball marker. The black wire leads to the eye on the left side.*

To reassemble your device with a new eye wire, follow this guide in reverse.
