

# Installing PowerBook G4 Titanium Onyx Lower Case

Author: iRobot

## Tools used in this guide

- [T8 Torx Screwdriver](#) (1)

## Parts relevant to this guide

- [G4 Titanium Onyx Lower Case](#) (1)

The bottom case slides off easily after removing a few T8 Torx screws.

## Step 1 — Lower Case

- Turn the G4 over.
- Remove the eight T8 Torx screws from the lower case.

## Step 2

- Using your thumbs, slide the lower case away from you.
- The lower case may stick in the front on a tab just above the center of the DVD drive. Be careful as you work the case off, or you may break the thin strip of plastic just above the drive.
- Lift the lower case off.

## **Step 3**

- Your laptop should look approximately like this.

To reassemble your device, follow these instructions in reverse order.

Logic Board  
2 T8 Torx

To organize your screws, simply place each screw in the appropriate box as you remove them from your laptop.

If you are not planning on immediately reassembling your laptop, you may want to tape the screws to this paper.

Due to model variations, the screws you remove may differ slightly from this guide.
