Step 1 — Battery

(i) Before starting, please turn off your laptop.

● Using the blue plastic opening tool or a flat bladed tool, carefully slide the blade in between the display panel and gently slide to prop open the assembly.
Step 2

● Gently lift and remove the display panel from the assembly.

● Remove the translucent yellow tape that covers the battery connector on the mainboard.

(i) The tape will be in the way for a future step.

Step 3

- Flip up the small white colored locking flap using the tip of a spudger or your fingernail. Then the ribbon cable can be removed easily without much effort.

- Carefully disconnect the white ribbon cable from the mainboard.

Step 4

- Carefully disconnect the battery cable from its connector on the mainboard.

Step 5

- Using the Phillips #0 screwdriver, carefully remove the 4 corner screws that hold the battery to the display panel.

- (i) 3 screws are 3.12 mm head, 2.40 mm length, and 1 screw is 5.85mm head, 2.5mm length.

- Remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
