INTRODUCTION

This guide will tell you how to replace the optical drive for the HP ProBook 450 G3.

TOOLS:

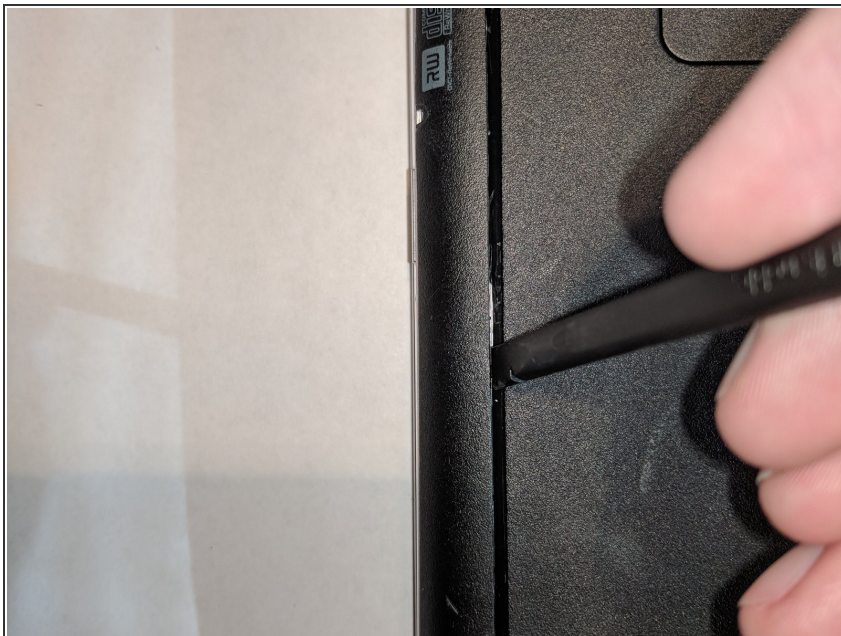

- [T8 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Optical Drive

- Remove the 2.5 torx screw.
- Pivot the spudger between the hard-drive and the optical drive. Push the optical drive away from the center of the computer.

Step 2

- Using the spudger carefully place the pointed end into the gap that covers the optical drive.

To reassemble your device, follow these instructions in reverse order.
