Step 1 — Home Key

- Separate the back casing from the phone by carefully using your fingers to pry them apart.

Step 2

- Remove the battery.

Step 3

- Remove all ten screws by using a Phillips #000 screwdriver.

Step 4

- Use the flat side of a spudger to remove the middle frame bezel.

⚠ Do not twist or wrench the spudger during this step as it will cause the screen to crack.

Step 5

- Gently pull the glass up from the side of the phone and push the home button out.

- (i) When you pull the glass up, it will make a popping sound. This is normal.

Step 6

- Replace the home button and press the glass back in place.

To reassemble your device, follow these instructions in reverse order.
