## Step 1 — Screen

- Open the latch that accesses the charging port.
- Remove the black sticker and remove the screw with the indicated screw driver.
- Take the plastic opening tool and run it down the side of the remote to pop the case open.

**⚠ While doing this step there are three wires that connect the two pieces, be sure not to rip them out.**

- Detach the white clamp to partially disconnect the case from the motherboard.

## Step 2

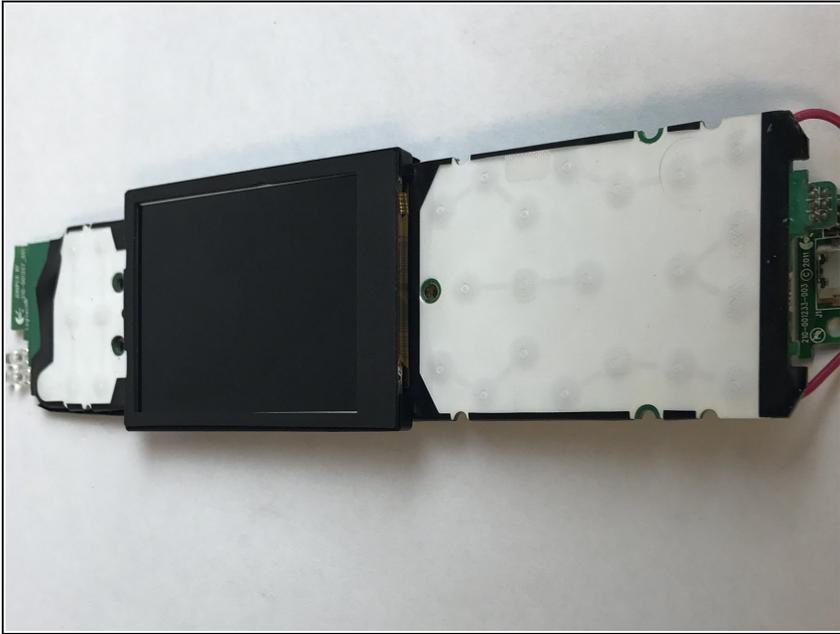

- Peel back thin yellow plastic film and detach the clip found underneath.
- Use a Phillips #00 to remove the screws that connect the motherboard to the case.

## Step 3

- Carefully remove the motherboard from the top piece of the case.
  - ⓘ The motherboard is connected to the bottom part of the case.
  - ⓘ You should be able to access the screen which is located on the back of the motherboard.

## Step 4

- Separate the screen from the motherboard.
