HP G62-144DX RAM Replacement

How to replace the RAM in the HP G62-144DX.

Written By: Cameron Moran

INTRODUCTION

This guide will show you how to remove the back panel and replace the 2 RAM modules in the HP G62-144DX.

⚒ TOOLS:

- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)

Step 1 — Battery

⚠ Make sure to turn off the laptop before removing the battery.

● Slide the lock to the right, located slightly above the battery location.

● While pulling the lock, pull the battery out, keeping it flat and parallel to the laptop so that it slides out easily.

Step 2 — RAM

- Unscrew the three Phillips 2.5x6 screws in the L-shaped panel on the back with a Phillips #1 screwdriver.

- (i) The screws will stay in the panel, but will come loose from the body of the laptop.

- Use a plastic opening tool to gently pry the panel free from the laptop.

Step 3

- Pull the two metal clips to the top RAM module outwards parallel to the laptop.

- After the RAM module pops up, gently pull in out from the computer.

- Repeat for the second RAM module.

To reassemble your device, follow these instructions in reverse order.
