---

# INTRODUCTION

This guide will instruct you on how to remove the motherboard from your device.

---

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Back Panel

- Place this device back panel facing up.

## Step 2

- Using the screwdriver, unscrew the highlighted 1.2mm Phillips head #0 screws which secure the back panel into place.

### Step 3

- Using the plastic opening tools, separate the back panel from the rest of the device.
- Do this by firmly pressing the head of the tool into the space between the back panel, and the rest of the device.

### Step 4 — Battery

- Pull the back panel off.

## Step 5

- Notice the L-shaped battery in the lower right corner of the opened laptop.
- Disconnect the battery from the slot it is connected to. You'll need to push on the sides of the clip and pull.

## Step 6

- Lift up the battery with your fingers and remove it from the laptop.
- Place the battery away from the laptop in a safe spot and insert your new battery by hooking it up to the slot you previously disconnected the old battery from.

## Step 7 — MotherBoard

- Unscrew the 4 1.2mm Phillips #0 screws connecting the motherboard to the laptop case.
- Disconnect the wires connecting to the motherboard to the USB ports.
- Disconnect the ribbon cables connecting the keyboard, and track pad of the device.

## Step 8

- Lift the motherboard up and out of the device casing.

To reassemble your device, follow these instructions in reverse order.
