Step 1 — Motorized Brush

⚠ Turn power OFF.

● Detach motorized brush from the vacuum.

Step 2

● Use a spudger or a coin to turn the circular lock clockwise to unlock the brush roll.

● Remove the lock cover.

Step 5

- Take out the motor assembly.

Step 6 — Motorized Brush Belt

- Take the belt off the gear by using a spudger.

Step 7

- Grab the new belt and slide it on to the two gears.

- Place the motor assembly back into the motorized brush enclosure.

To reassemble your device, follow the motorized brush disassembly instructions in reverse order.
