INTRODUCTION

In this guide the back cover, and RAM card will be removed so that a new RAM card can be inserted.

TOOLS:

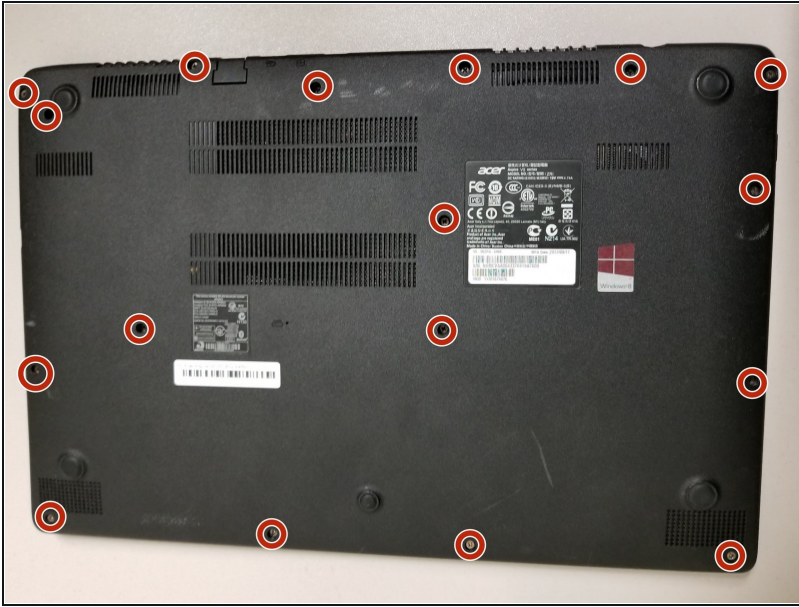

JIS #0 Screwdriver (1)

Step 1 — Back Case

- Remove the storage tray on the left edge of the device.

Step 2

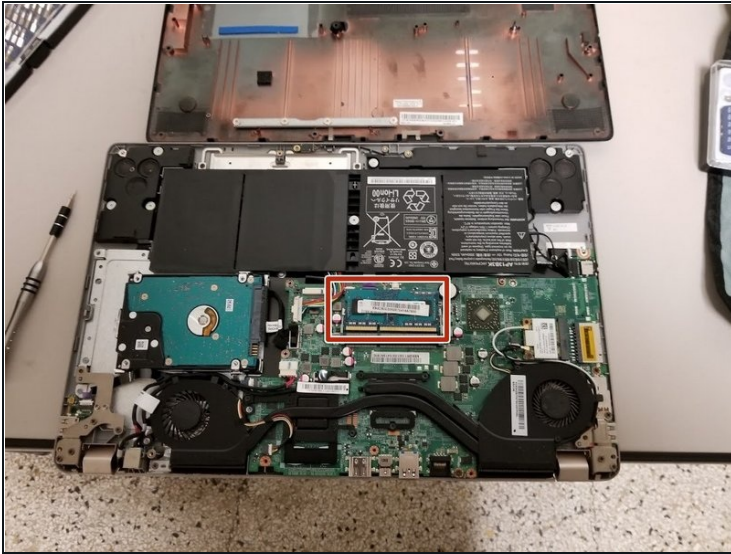

- Use a Phillips #0 screwdriver to remove seventeen 7mm screws from the lower case.

Step 3

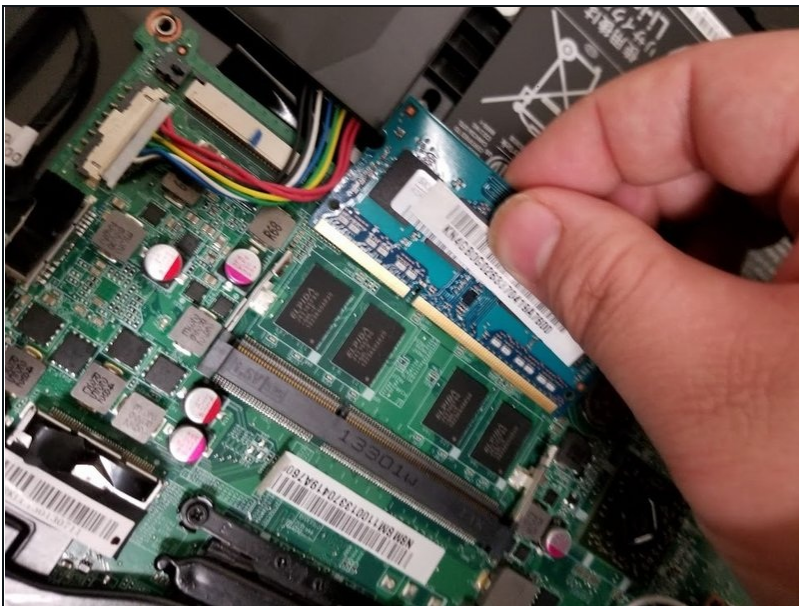

- Lift up the back case to remove it.

Step 4 — RAM

- Locate the RAM slot and push outwards on the metal tabs to release the RAM card.

Step 5

- Carefully slide the RAM card out of its slot, and insert the replacement card

To reassemble your device, follow these instructions in reverse order.
