INTRODUCTION

Replacing the system battery for this laptop is quite easy, as it is accessible externally and requires no screws to remove.

'Make sure to turn off your computer before performing the steps in this guide.'

Step 1 — Release battery

- Remove the system battery.
- Slide the battery latch release on the bottom of the computer in the direction of the #1 arrow. The access door will pop up.

Step 2 — Slide Battery

- Using your thumbs, slide the battery in the direction of the #2 arrow by inserting one thumb into the recess

next to the battery access door and the other thumb into the indentation surrounding the #2 arrow.

Step 3 — Lift battery

- Lift the battery straight up and out of the computer.

To reassemble your device, follow these instructions in reverse order.
