Step 3

- Orient the computer upside down, with the hinges facing away from you.

- Find the black plastic piece in the SD card slot on the right side of the computer.

- Remove the plastic piece by sliding it out of the SD card slot.

Step 4

- Insert a spudger at these eight locations to disengage the plastic tabs from the housing cover, and pry apart.

  - Continue around the entire perimeter of the cover with the spudger.

- (i) Use a spudger to pry the cover around I/O ports.
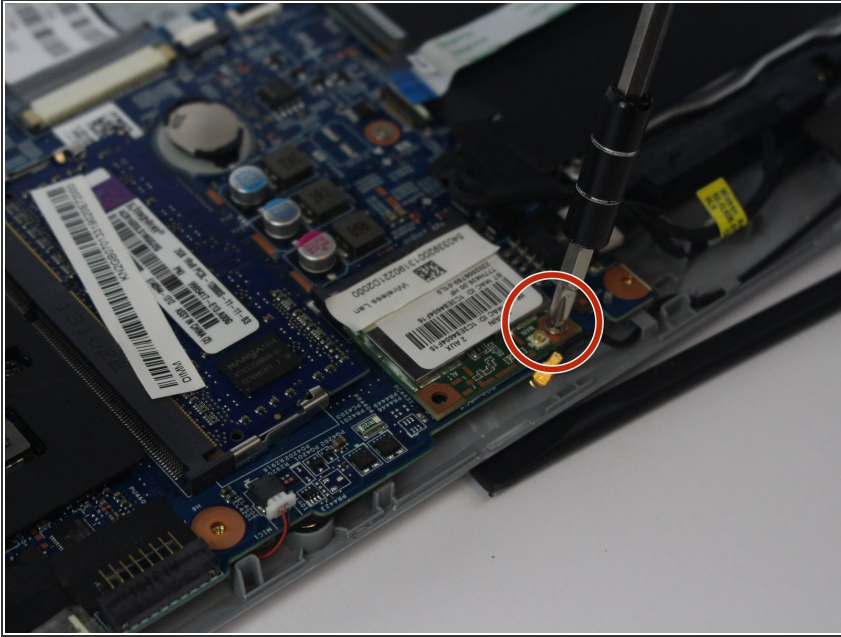

|

Step 5

- Remove the two 4mm screws using a PH0 screwdriver.

- Depress the tabs holding the battery with a spudger.

- Disconnect the battery connector from the motherboard using a spudger.

- Pull the battery up and away from the laptop to remove.
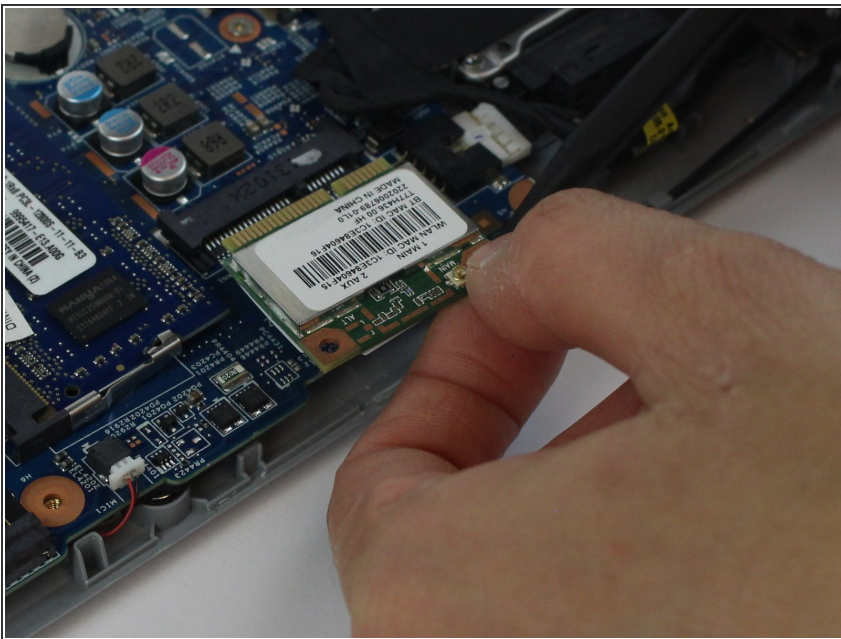

Step 6 — Network Card

- Remove the wire connector from the network card using a plastic opening tool.

Step 7

- ● Remove the 3mm Phillips #0 screw.

Step 8

- ● Gently slide the network card out of the motherboard connector.

To reassemble your device, follow these instructions in reverse order.
