

If you're stuck with the Apple logo (iPhone)

If you're stuck with the Apple logo, here is the solution without restoring your phone and losing any data. (only experimented on iPhone 6 so far)

Step 1 — If you're stuck with the Apple logo (iPhone)

- 1. Do not perform a hard reset (holding home+power) when you're updating / downloading the system or any apps! You will end up being stuck on the Apple logo.

Step 2

- 2. But somehow you're stuck with it, do not perform a restore like Apple tells you to, you will lose any data that's not backed up.

Step 3

- 3. Put your phone to the side, unplug the charger, let it be with the Apple logo on the screen, and enjoy your day.

Step 4

- 4. After it dies, plug the charger in, and it will be turned back on like nothing happened.
