

iRobot Roomba 805 Filter Replacement

How to replace the filter of an iRobot Roomba 805.

Written By: Kermalea Altenburg

INTRODUCTION

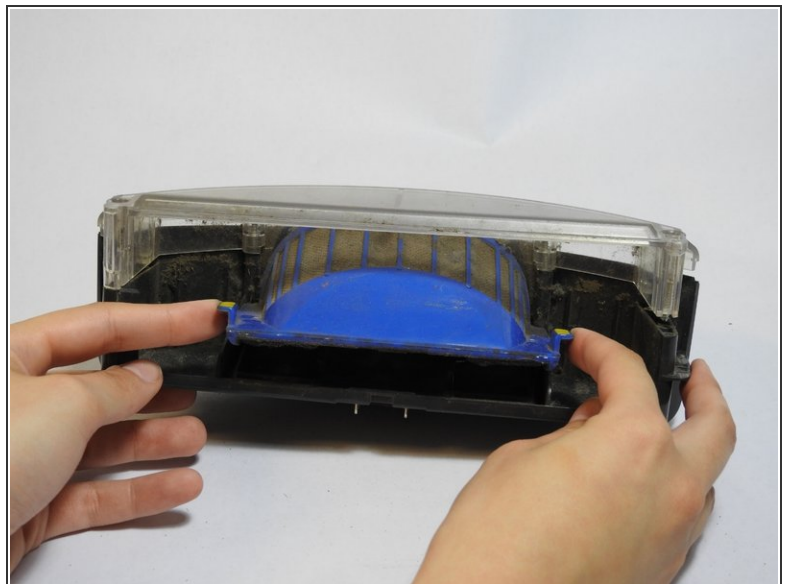

For this guide, you should be aware that the filter may be very dusty.

Step 1 — Filter

- Face the Roomba with black button at the bottom. Click the bottom button.

Step 2

- Gently pull out the cartridge. Then push in the yellow tabs to remove the filter.

To reassemble your device, follow these instructions in reverse order.
