INTRODUCTION

In this guide we are going to replace the charging report on the Huawei ascend Y300 android smartphone. Before starting, it is a good idea to prepare an organized area to carry out the repair. It is also helpful to have a way of containing loose screws so they do not become lost. In addition, his guide requires soldering, a "How To" guide is included.

🔧 TOOLS:

- T4 Torx Screwdriver (1)
- iFixit Opening Tools (1)
- Soldering Iron (1)
- Tweezers (1)

Step 1 — Charging Port

- Remove the back plate by hand. There is a small indent on the bottom of the phone to pry open.

Step 2

- Lift up and remove the battery.

Step 3

- Use a T4 Torx screwdriver to remove the 8 screws along the outer edge of the case.

Step 4

- Using the plastic opening tool, pry the screen from the casing. Insert the tool between the case and screen to pry the pieces apart.

- ⊠ Take care to not damage the screen or case.

Step 5

- Use a soldering iron to desolder the four connections to the charging port.

- (i) For information regarding how to properly solder, click the following link. How To Solder and Desolder Connections.

To reassemble your device, follow these instructions in reverse order.
