## Step 2

● Separate the plastic case from the keyboard at the seam using a plastic opening tool.

## Step 3

● Fully separate the plastic case from the keyboard by lifting it upward.

## Step 4

ⓘ The small and wide ribbon cables connect the keyboard to the motherboard.

● Disconnect the small ribbon cable by lifting the flap and sliding it out of the motherboard input toward the battery using a spudger.

● Disconnect the wide ribbon cable by lifting the flap and sliding it out of the motherboard input toward the battery using a spudger.
