

# Samsung Galaxy J6 Display Replacement

Follow this guide to replace the display of the Galaxy J6 device.

Written By: Smilzo

 **TOOLS:**

- [iFixit Opening Tool](#) (1)
  - [iFixit Opening Picks \(Set of 6\)](#) (1)
  - [iSesamo Opening Tool](#) (1)
-

## Step 1 — Cut the screen adhesive

**⚠ I recommend wearing eye protection to avoid any inconvenience with glass fragments.**

- It is very important to heat the display on the side parts where the double-sided adhesive is well with a hairdryer or other so as to make it lose its adhesion and facilitate the operation of inserting the blade to lift it.
- Insert the blade between the body and the glass and begin to separate the display from the body, I recommend starting from the top paying attention.
- The flat connection connectors are located at the bottom.

## Step 2 — Lift up the display

- Lift the display.

This document was generated on 2022-08-29 09:27:03 PM (MST).

### Step 3 — Remove the display

- Unplug the black plastic plug securing the display connector.
- Unhook the display connector.
- Remove the old display and place the new display.
- Put some glue to attach the new display.

To reassemble your device, follow these instructions in reverse order.
