INTRODUCTION

If your Samsung Odyssey NP800G5M is not powering on or charging, it is most likely due to a faulty/dead battery. The battery can be replaced in a few simple steps. However, take the necessary precautions.
TOOLS:

- Spudger (1)
- Phillips #0 Screwdriver (1)

Step 1 — Battery

- Remove the eleven 6.6 mm screws on the back of the computer using the Phillips #0 screwdriver.

Step 2

- Using the opening tool, gently pry apart the back corners until the plastic separates from the body of the laptop.

- Work your way around the body of the laptop until the back cover is completely separated.

- Remove the back casing.

Step 3

- Disconnect the battery connector cable.

⚠ Working on the device without removing the battery connector cable can damage major components of the device.

Step 4

- Remove the four 6.6 mm screws using the Phillips #0 screwdriver.

- Remove the battery from the device.

To reassemble your device, follow these instructions in reverse order.
