

# PSP 2000 Speaker Replacement

Replace the speaker on a PSP 2000.

Written By: espinks

## INTRODUCTION

Going deaf? Perhaps it's just the speaker...replace it! Use this guide to replace the speaker on Sony's PSP 2000.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tool](#) (1)

### PARTS:

- [Sony PSP 2000/3000 Speaker Set](#) (1)

## Step 1 — Battery

- Place PSP face down, so that the UMD Drive is facing upwards.
- Locate the battery door and open.
- Remove the battery from inside.

## Step 2 — Front Casing

**⚠** This step requires the removal of the warranty sticker. **Removing the sticker will void the warranty.** According to the FTC removing this will not void your warranty.

- Locate the sticker in the battery compartment labeled: *"En: Warranty Void if Seal Damaged."*
- Remove the sticker using the PSP Opening Tools.
- ⓘ Under the sticker is a 5mm Phillips screw needed in the next step.

## Step 3

- Remove four 5 mm Phillips from the case.
- ⓘ If the screws stick in the case, you can use a magnetized screwdriver to draw them out.

## Step 4

- Remove the following screws from around the bezel:
  - Two 4 mm Phillips
  - One 5 mm Phillips
- ☑ The two shorter 4 mm screws are on the top of the PSP; the longer 5 mm screw is on the bottom.

## Step 5

- Gently pry the front bezel away from the casing using a PSP opening tool.
  - Start on the right hand side of the PSP bezel, and carefully work the tool around the side.
- i** If you want to clean the control buttons or D-pad, you can easily pop them out once the faceplate is off and wipe them clean.

## Step 6 — Display

- Remove the home bar by gently prying on the left and right sides of it with the opening tools. Lift the bar out of the device.
- ⚠** A ribbon cable connects the home bar to the logic board. Be careful not to damage the cable when removing the bar.

## Step 7

- With the home bar out of the way, gently pry up the display using the opening tools.

**⚠ There is another ribbon cable attached to the bottom of the LCD. Be careful not to damage either of the connectors when removing.**

- Lift the black tabs of the ribbon cable connectors using a opening tool. Pull the ribbons out towards the bottom of the PSP to disconnect.
- Gently lift out the display.

## Step 8 — Speaker

- Use the opening tools to press the tab on the left-hand side of the speaker to release it.

**⚠ Be careful not to puncture the speaker in the process.**

- Remove the speaker by twisting it counter-clockwise (to the left, like a screw).

To reassemble your device, follow these instructions in reverse order.
