

Update an iOS device (iPadOS)

This guide will show you how to update your iOS...

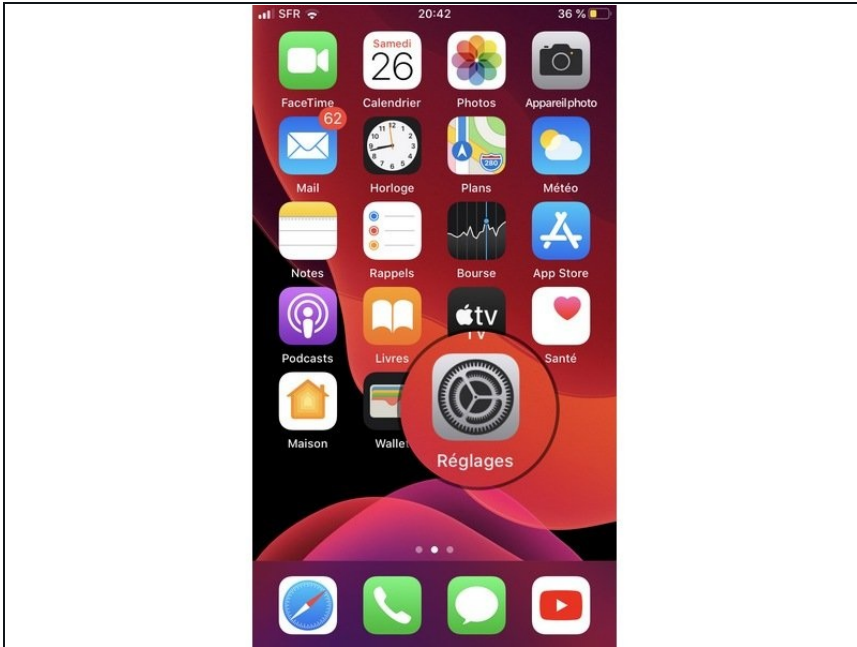

Written By: Tom

INTRODUCTION

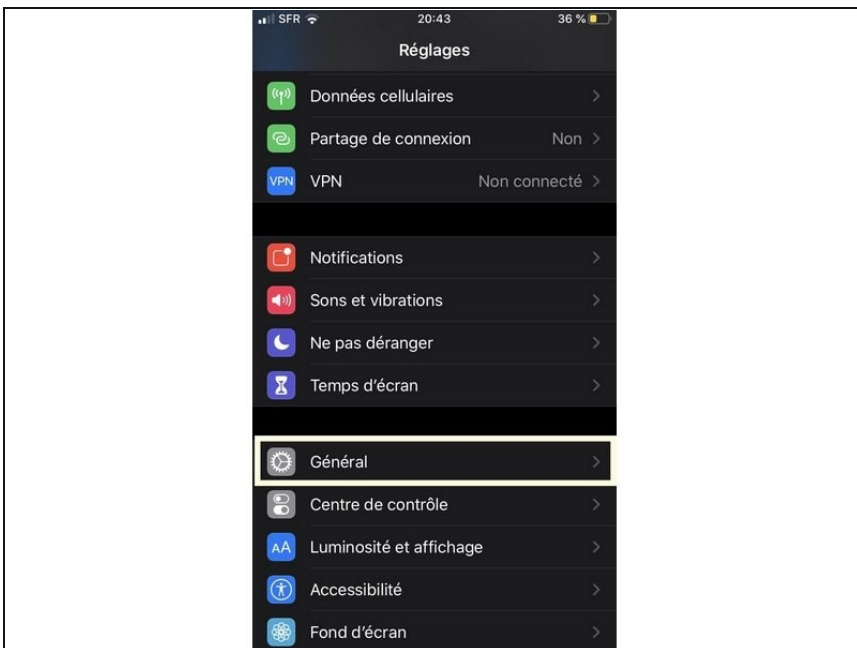

This guide will show you how to update your iOS device.

Step 1 — App selections

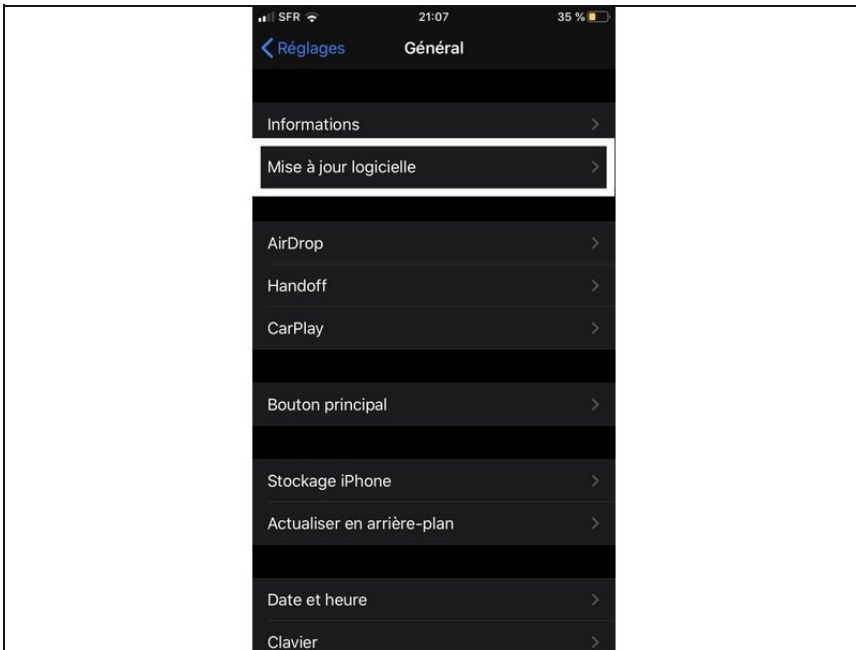

- Open the **Settings** app.

Step 2 — Navigation in the menu

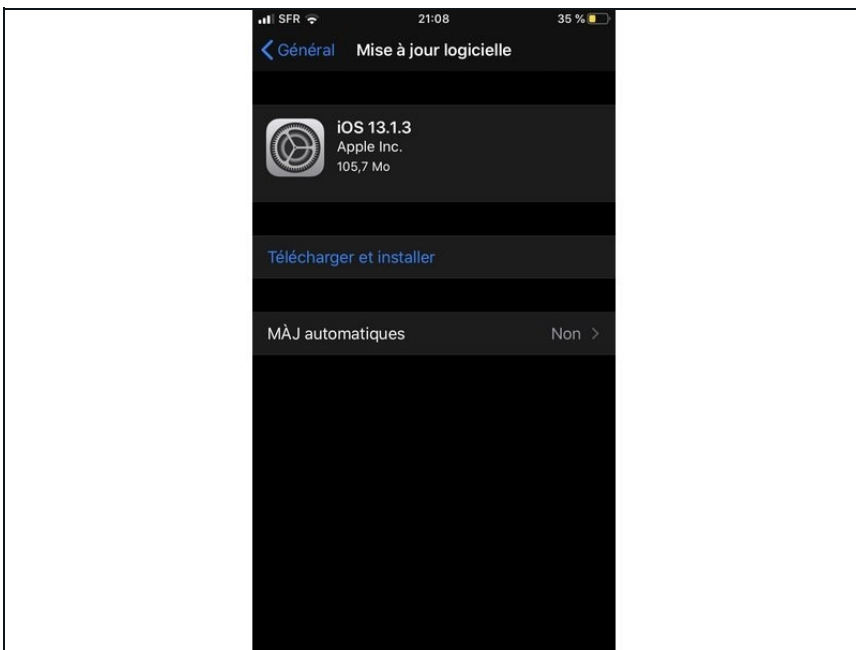

- Swipe the screen to find **General**. Then select it

Step 3 — Selection of the menu

- Select the Software Update menu.

Step 4 — Downloading and installing the update

- If an update is requested, select **Download and install**.

⚠ Your device must be WiFi and connected to the mains or be charged to more than 50%.

To reassemble your device, follow the instructions in reverse order.
