

Change Battery Remote Control Ford Focus MK3

Battery CR2032 Replacement

Written By: Michael

TOOLS:

Spudger (1)

PARTS:

CR2032 Lithium Battery (1)

Step 1 — Battery CR2032

- To open the remote control you need a circlip caliper (in german: Seegerringzange ;).
- The forks of the tool are moving away from each other, when you pull the handles together

Step 2

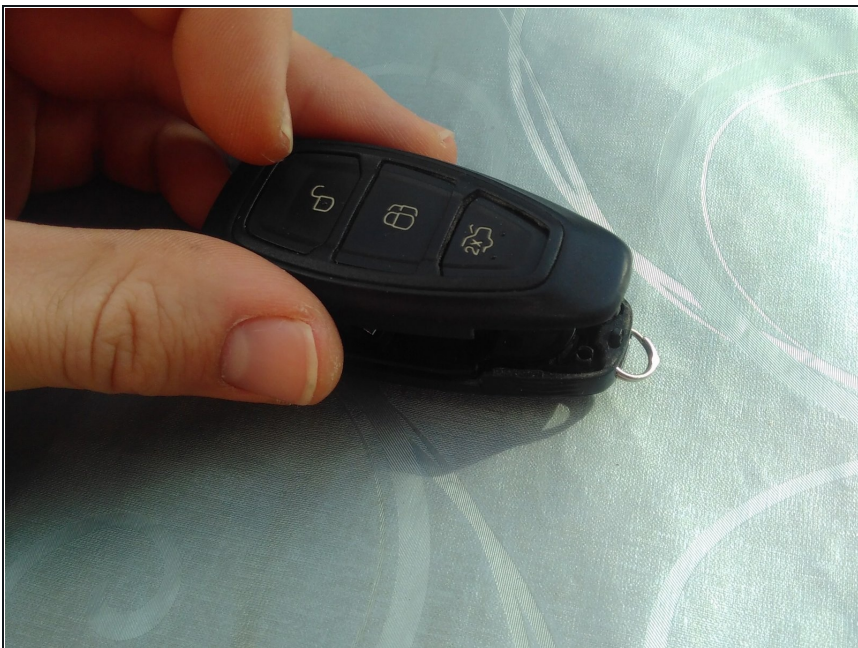

- Place the tool in the indentation.
- The forks moving direction has to be perpendicular to the gap of the case .
- prrie one side open then do the same on the other side

Step 3

- Remove the spent battery with the nonconductive spudger tool

Step 4

- Place the new battery in the mounting
- Check Polarity! Negative pole is facing you.
- Carefully put the case together
- Cover old battery with duct tape and take care of the disposal.
- Be happy an drive safely, because you're done!

To reassemble your device, follow these instructions in reverse order.
