

# Repair a Dexter Corded Belt Sander - 900W

## 2.5in width

Written By: Céline Chemineau

 **TOOLS:**

- [New Item](#) (1)
-

## Step 1 — Unplug

 Before starting, remember to unplug the device.

## Step 2

- Remove the handle by unscrewing the screw.

### Step 3

- Pry up the sanding belt to remove it.

### Step 4

- Unscrew the four screws to access the drive belt.

## Step 5

- Remove the drive belt.

## Step 6

- Replace with the new drive belt. To put it on, place the drive belt on the right wheel first.

## Step 7

- Screw the protection cap back into place with the four screws.

## Step 8

- Replace the sanding belt and handle.
