

# Open the rear cover of the Saeco Exprelia

Opening of the Saeco Exprelia rear cover

Written By: VauWeh

---

## INTRODUCTION

Most repairs start with the removal of the rear cover. This one is fastened with two screws on the bottom and two bayonet-like locks on the top

---

### **TOOLS:**

- [TR10 Torx Security Screwdriver](#) (1)
-

## Step 1 — Open the rear cover of the Saeco Exprelia

- Remove all accessory parts like the water reservoir, the brewing assembly as well as the drip tray.
- Remove all coffee beans from the bean container

**⚠ Always remove the power cord**

- Remove the two T10 Torx screws from the bottom of the rear cover.

## Step 2

- Pull the back cover approximately 1 cm (3/8inch) out from the bottom and push it in an upward direction.

To reassemble your device, follow these instructions in reverse order
