INTRODUCTION

This guide is for first time builders or people that bought prebuilt computers in a Lian Li PC-011 case. This guide will walk you through how to install or replace a 3.5 hard drive in the case. It is not a very difficult task and it should only take you 30 minutes to complete.

## 🔧 TOOLS:

- Phillips #0 Screwdriver (1)

⚙ PARTS:

- 4 TB 3.5" Hard Drive (1)

Step 1 — Hard Drive

- Power off the system using the button on the back of the computer.

- Remove the power cord from the computer.

Step 2

- Remove two thumb screws from the back of the case.

- Slide the top panel backwards.

Step 3

- Remove the remainder of the panels by pulling upwards on them.
Step 4

- Remove the two 3 mm Phillips #2 screws from the wire cover.

Step 5

- Unplug the two cables from the hard drive.

Step 6

- Push together the bottom and top tabs and pull the hard drive tray out of the case.

Step 7

● Remove four #2 Phillips screws from the hard drive case in a cross pattern.

Step 8

● Replace the old hard drive with the new hard drive.

To reassemble your device, follow these instructions in reverse order.
