

Adidas Crazyquick Football Cleat Studs Replacement

This guide will show you how to replace the old studs on your football cleats!

Written By: Jonathan Ramirez

INTRODUCTION

Use this guide for replacing the worn out studs on your cleats (Ex. Adidas, Crazyquick Football Cleat).

If you see that your studs on your cleats are either shortening or becoming uneven, it may be time to replace those worn out studs. Before you begin replacing the studs, you must check to see the studs **can** be replaced. The best way to check is to count how many studs you have, typically cleats with replaceable studs have **7** studs.

In order to proceed with replacing the studs, you must have the replacement studs and the stud wrench that helps tightening/ loosening of the studs which can be purchased [here](#).

TOOLS:

- [Stud Wrench](#) (1)
 - [1/2 Inch Athletic Studs](#) (1)
-

Step 1 — Studs

- Grab the stud wrench.

Step 2

- Insert the wrench onto the old stud.

Step 3

- Turn the stud left to loosen.

Step 4

- Screw off the old stud with your hand.

Step 5

- Screw on the new stud with your hands.

Step 6

- Insert the wrench onto the new stud.

Step 7

- Turn the wrench right until the stud is tight.

Step 8

- Repeat steps 2-7 in order to complete the other 6 studs.
