# Fujifilm Finepix F10 6.3 MP Flash Battery Replacement

If flash fails to work and other troubleshooting has failed, install a new flash battery.

Written By: Sarah Looper

INTRODUCTION

The flash battery provides the power necessary to create the flash. This guide describes how to find and remove this battery in order to install a new one.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Spudger (1)
- Tri-wing Screwdriver (1)

Step 5 — Front cover

- Remove screws from motherboard using the Phillips 00 screwdriver.
  - Two 2.5 mm widehead Phillips screws
  - One 3.3 mm #00 Phillips screws
  - Three 2.5 mm #00 Phillips screws (black screws)
Step 6

- Rotate the front cover clockwise onto its side and remove the single screw on the side using a Phillips 00 screwdriver.
  - Remove 3.3 mm #00 Phillips screw from the side of the front screen.

Step 7

- Firmly grasp both the motherboard and front cover. Slowly pull the front cover away from the motherboard.
  - (i) Do not be alarmed if it takes substantial pressure to separate the two.

Step 8 — Flash Battery

- Gently remove battery from casing.

To reassemble your device, follow these instructions in reverse order.
