

Lenovo Yoga 900-13ISK Back Cover Replacement

This repair guide will demonstrate the process...

Written By: Austin Blakely

INTRODUCTION

This repair guide will demonstrate the process of removing the back cover for the Lenovo Yoga 900-13ISK laptop. The bottom case is responsible for keeping dust and debris from interfering with the internal componentry of the laptop. If the bottom of your laptop case has been dented or damaged, replacing the cover will keep your components safe.

Removing the back cover will also allow you to access the inside of the Lenovo Yoga 900 in the case that you need to repair or replace a component, and is the first step in most repairs for this device.

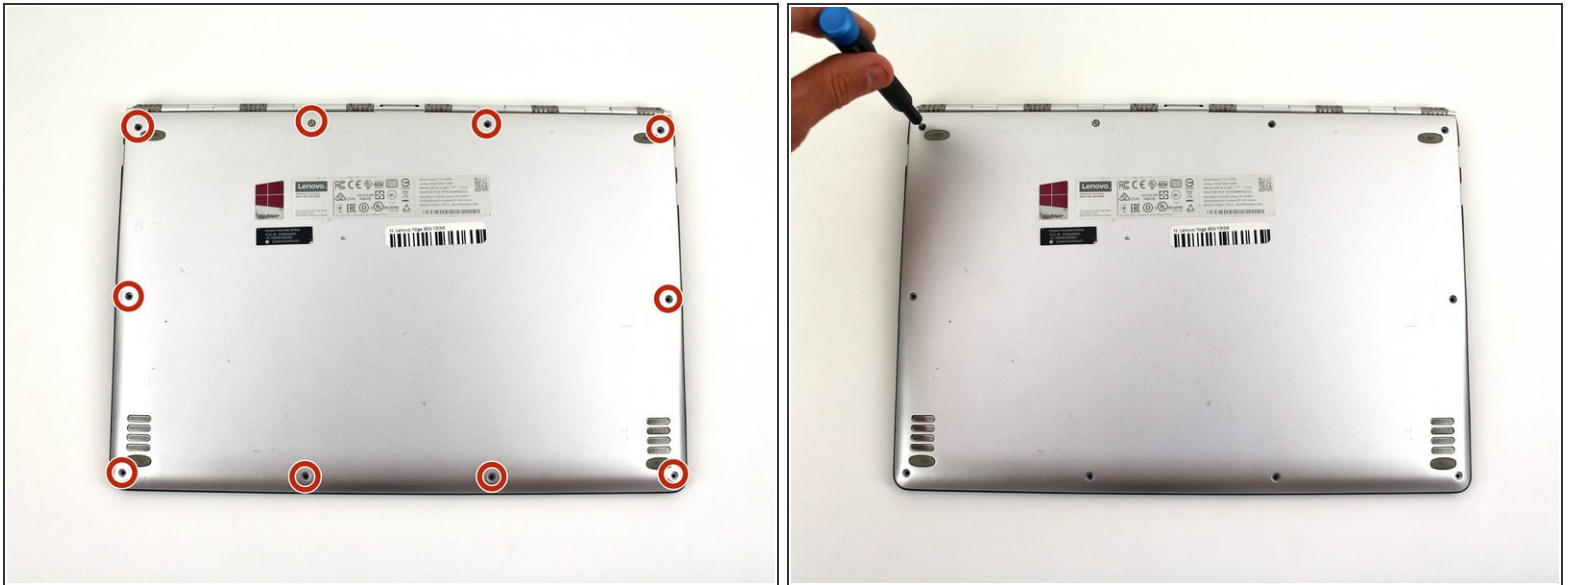

Be sure to unplug and completely turn off your device before you start working.

TOOLS:

- [T5 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Back Cover

- Using a T5 Torx screwdriver, remove the ten 5.5 mm screws from the back case of the laptop.

Step 2

- Use a spudger to pry open the back case at the hinges of the laptop.
 - ❗ There are plastic clips around the perimeter of the case holding down the back cover. These will need to be popped off as the cover is removed.
- Use your fingers to completely pop off the back cover.

To reassemble your device, follow these instructions in reverse order.
