Dell Latitude E6330 Memory Chip (RAM) Replacement

A guide on how to replace memory chips inside this DELL computer.

Written By: Hezekiah Brown
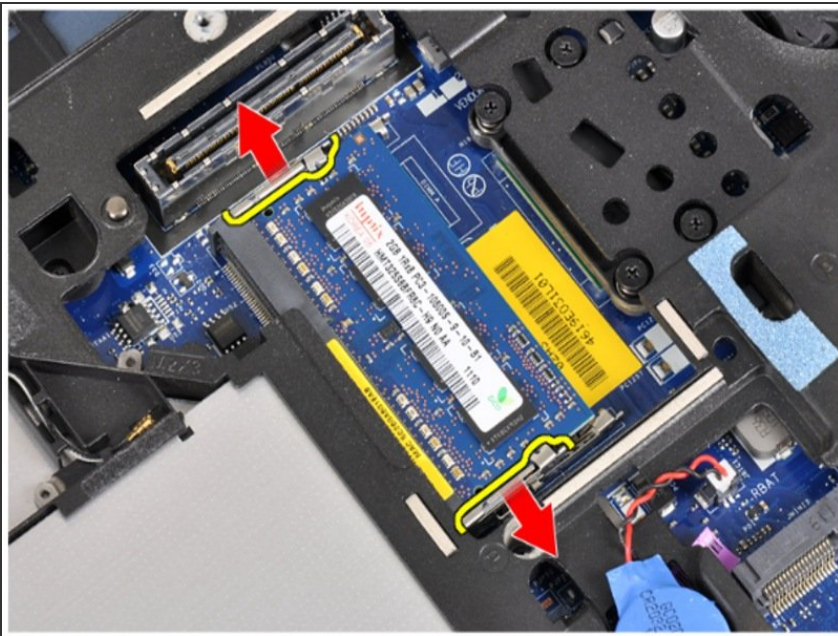

Step 1 — Remove battery and base cover

⚠️ Shut down your computer. Disconnect all power sources before opening the computer cover or panels.

● Remove the battery and base cover from the computer.

Step 2 — Pry securing clips

● Pry the securing clips away from the memory module until it pops up.

Step 3 — Remove memory chip (module)

- Remove the memory module from its connector on the system board by drawing the module from the system board at 45-degree angle.

- Repeat steps 1 and 2 to add the second memory chip (module).

Step 4 — Install battery and base cover

- Install battery and base cover.

To reassemble your device, follow these instructions in reverse order.
