Microsoft Surface Laptop 3 15" Feet Replacement

Follow this guide to remove or replace the feet...

Written By: Carsten Frauenheim

INTRODUCTION

Follow this guide to remove or replace the feet on the bottom of a Microsoft Surface Laptop 3 (15").

Microsoft offers replacement feet for the Surface Laptop 3. Please see this support article for more details on how to order them.

🔧 TOOLS:	⚙️ PARTS:
Spudger (1)	Surface Laptop 3/4/5 Feet - Genuine (1)

Step 1 — Flip the laptop over

- Flip the laptop over and place it on your work surface, feet facing up.

Step 2 — Removal tip

(i) The feet on the bottom of the laptop are meant to be removed with the pointed end of a spudger.

- Each foot has a hidden indent that will simplify removal.

- To make sure the spudger is in the indent, insert it at the nearest **long edge**, pushing parallel to the short edges of the laptop, as shown.

(i) Note that the two feet near the rear (screen) edge are different than the two front feet.
Step 3 — Remove the rear feet

- Insert the pointed end of a spudger underneath one of the two rear feet, at its rear edge.

- Push the spudger underneath the foot and pry up to release it.
  - ⓘ The two rear feet are secured with some light adhesive.

- Repeat to remove the second rear foot.

Step 4 — Remove the front feet

- Insert the pointed end of a spudger underneath one of the two front feet, at its front edge.

- Push the spudger underneath the foot and pry up to release it.
  - ⓘ The two front feet are secured with plastic clips as well as light adhesive.

- Repeat to remove the second front foot.

Step 5 — Reassembly tip

During reassembly:

- Note that the front and rear feet are different.

- Note that the front feet are directional and only clip in one way.

Step 6 — Reassembly tip

In place of reusing old, worn out feet on your device, 8 mm rubber furniture pads can be a good substitute.

- Peel a pad away from its backing, align it over a foot cavity, and press to secure.
