Step 1 — Back glass

- First get a heat gun or a hairdryer.

Step 2

- Heat up each side for about two minutes.

This document was generated on 2022-04-06 02:55:55 AM (MST).

Step 3

- Once the adhesive has melted, stick in a pry tool and try to remove as much adhesive as possible, then use a suction cup to pry up on the back glass.

- Carefully apply the new adhesive onto the phone.

Step 4

- Carefully place the new back glass onto the newly installed adhesive.

- (i) Let it dry before peeling off the protective seal.

How to fix your device followed the steps shown.
