INTRODUCTION

Use this guide to replace the battery of the Dell Latitude 9410 2-in-1.

Failure to charge or inability to hold a charge may indicate a faulty battery. Check the troubleshooting page before moving forward with the battery replacement as there are other potential causes that are easier to address, such as a faulty charging port.

🔧 TOOLS:
- Tweezers (1)
- Phillips #00 Screwdriver (1)

Step 1 — Base Panel

⚠️ Ensure that the laptop is unplugged and powered off before beginning.

● Place the laptop upside down on a flat surface.

Step 2

● Use a Phillips #00 screwdriver to loosen the ten captive screws.

ⓘ The screws are permanently fastened to the base panel; do not attempt to remove them.

Step 3

- Carefully lift off the back panel.

Step 4 — Battery

- Use a Philips #00 screwdriver to remove the five 3mm screws that secure the battery.

Step 5

- Use a Philips #00 screwdriver to remove one 4.5 mm screw.
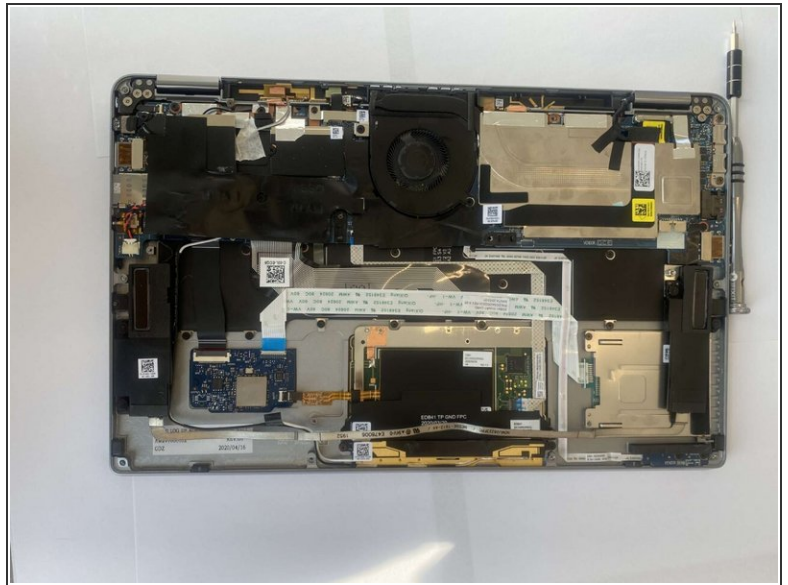

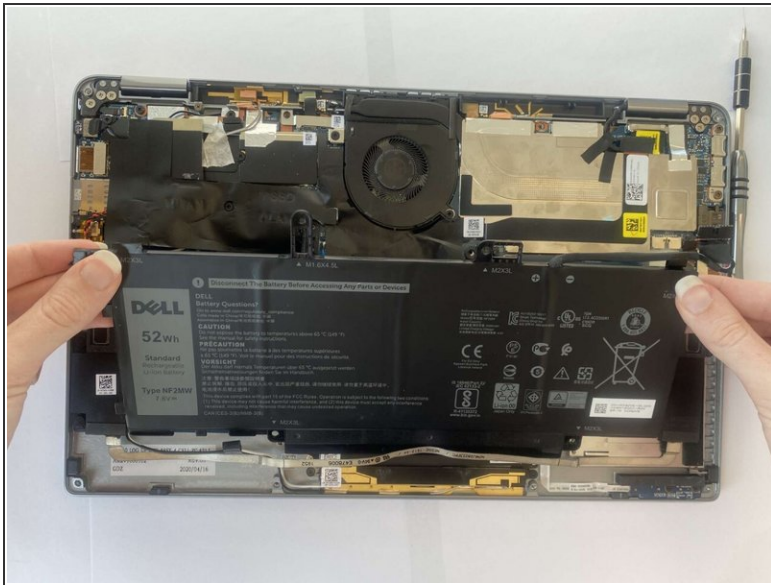

Step 6

- Grip the battery cable near the plug and pull it straight out, in the direction of the cable.

Step 7

- Use tweezers to gently move the speaker ribbon cable away from the bottom of the battery.

⚠ The ribbon cable is thin and fragile; handle it carefully.

ⓘ The ribbon cable only needs to be moved so that the battery can be removed; do not completely remove the ribbon cable.

Step 8

- Lift the battery out with two hands.

To reassemble your device, follow these instructions in reverse order.
