

How to Attach Googly Eyes to the Anti-Clamp

Use this guide to attach googly eyes to your...

Written By: Alex Diaz-Kokaisl

INTRODUCTION

Use this guide to attach googly eyes to your Anti-Clamp.

The personified Anti-Clamp is colloquially referred to as Clampy, but you can name it whatever you want, e.g., Clampalot, Clampus, John, etc.

For tips on how to tame Clampy, follow [this guide](#).

TOOLS:

[Tweezers](#) (1)
[Anti-Clamp](#) (1)

PARTS:

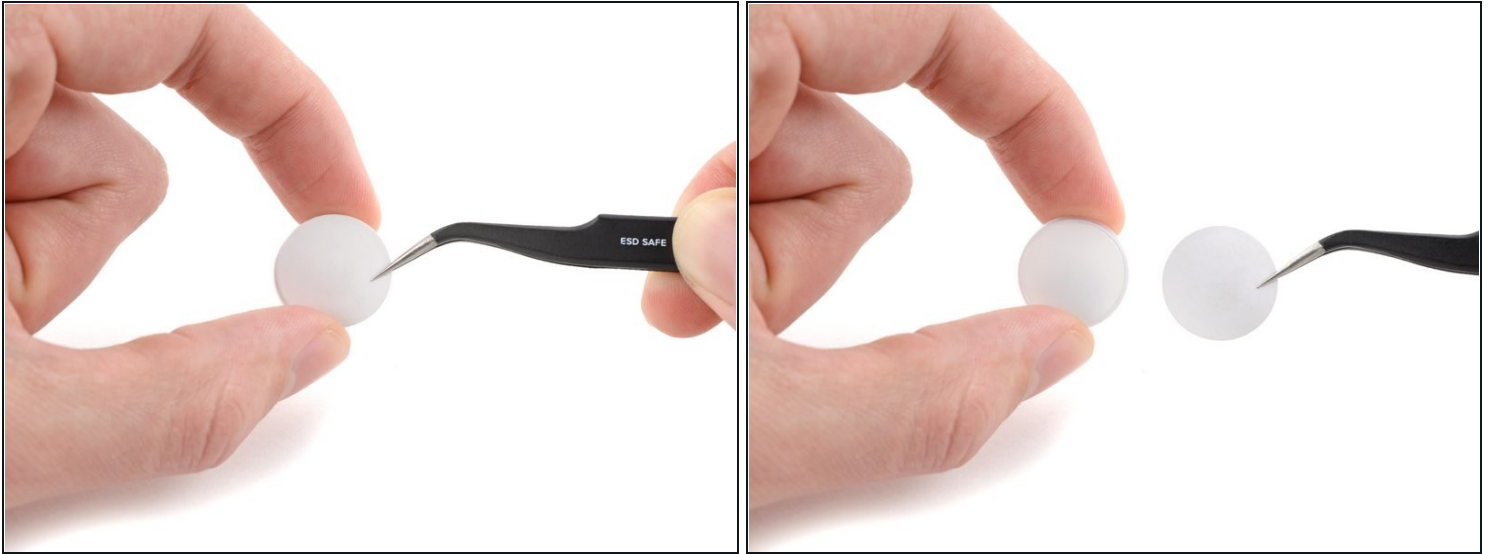

[Tesa 61395 Tape](#) (1)
[Googly Eyes](#) (1)

Step 1 — Clean Clampy

- Before you begin, wipe down Clampy to ensure a clean surface for the googly eyes to adhere to.

Step 2 — Peel off the liner

- Use tweezers, or your fingers, to peel off the paper liner and expose the googly eye's adhesive.
- Repeat the previous two steps for Clampy's second eye (unless you want a Cyclops Clampy).

Step 3 — Peel off the adhesive

- ① If you want to use alternate adhesive, follow the next three steps. Otherwise, skip to [this step](#).
- Use tweezers to peel off a portion of pre-cut adhesive.
 - ① It doesn't have to be a lot of adhesive—just enough to allow the googly eye to stick securely.
 - ① You can also use double-sided tape instead of pre-cut adhesive. Clampy isn't picky.

Step 4 — Apply the adhesive to the eye

- Place the sticky side of the adhesive on the back of a googly eye.
- Press down on the adhesive to ensure it's fully adhered to the eye.

Step 5 — Peel off the liner

- Peel off the remaining liner to expose the adhesive.
- Repeat the previous three steps for Clampy's second eye.
 - ① The only thing limiting the amount of eyes Clampy can have is your imagination.

Step 6 — Apply the eyes

⚠ You are about to perform the repair equivalent of ocular surgery! Proceed with caution and care for Clampy.

- Place the googly eyes on the top arm of Clampy, just above the suction cups.
- Press down on each eye to ensure they fully adhere to Clampy.

Step 7 — Alternative eye positions

i Depending on your Clampy's personality, you can position its eyes in various ways.

i The following images are some examples of alternative Clampy styles:

- [Prey](#) Clampy
- Suction-Cup-For-Feet Clampy
- Snail Clampy

Step 8 — Feed Clampy

① Congratulations, you have given Clampy the gift of sight! However, it will now hunger for devices to open.

- Give your Clampy something modest to open, like an iPhone 13 mini.

⚠ Make sure to remove the [two P2 Pentalobe screws](#) from the iPhone before giving it to Clampy.

Step 9

- Watch Clampy open the device like a pro.
- ① If your Clampy isn't sated, follow the next step.

Step 10

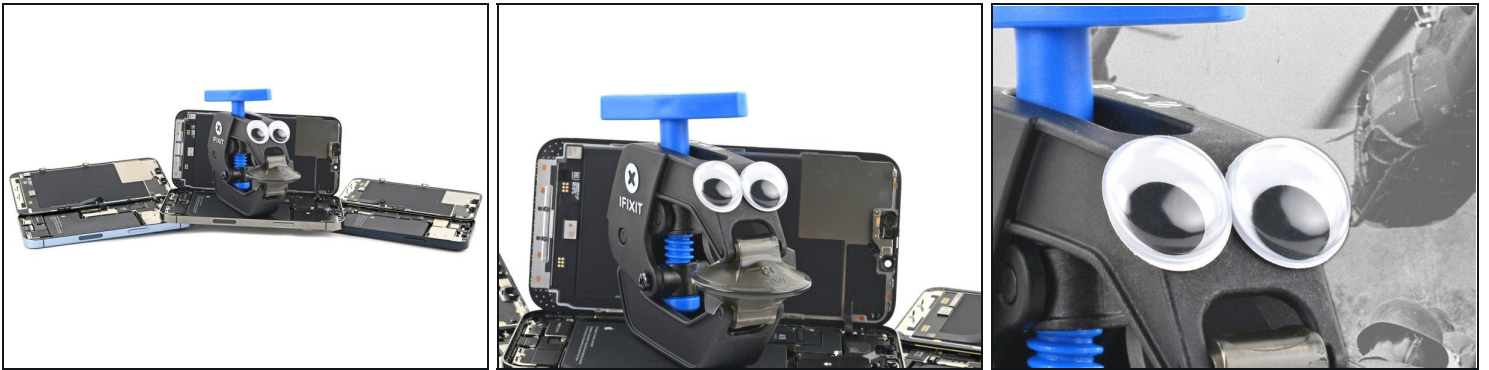

- Give your Clampy something larger, like an iPhone 13 Pro.
- Watch Clampy open this device with ease.
- ① If your Clampy seems to open this device even faster...almost like its appetite is growing, follow the next step.

Step 11

- Give your Clampy something monstrous, like an iPhone 13 Pro Max.
- Watch Clampy lose control of itself and tear open the phone with unnecessary violence.
- ① If you've run out of options, follow the next step.

Step 12 — Witness Clampy

- Witness Clampy sit atop his pile of victims, each a testimony to his power of suction.
- ① Legends tell of a clamp so powerful that even iPads shiver when they hear its name. Mothers all over the world tell their children that if they use too much adhesive on their electronics, a certain clamp will visit you in the night—and that clamp will show no mercy. These are only tales, however.
- ① But, perhaps you've invoked this clamp-like being by attaching googly eyes to the [Anti-Clamp](#). And that being's name is...
- Clampy

To send Clampy back to the realm of repair gods, follow the instructions in reverse order.
