

Disassembling Power Mac G5 Side Panel

Written By: Jessica Chaidez

INTRODUCTION

These instructions will show you the very first step into accessing the inside of the Apple G5.

Step 1 — Side Panel

- ⚠ To avoid electrocution, shut down the computer. Do not open the computer or attempt to install any items inside it while the computer is on.
- ⚠ To avoid being burned, wait at least 10 minutes to allow the computer's internal components to cool.

Step 2

- Remove all the cables, including the power cables before opening the unit.

Step 3

- Lift the tab to unlock the side panel.
- ⓘ The panel should fall out. If the panel does not fall out by itself pull a little from the edges.

Step 4

- Remove the air deflector (the clear plastic cover) by pulling on the handle.
