

Gateway NV52 Optical Disc Drive Replacement

This guide will give instructions on how to remove the Optical Disc Drive.

Written By: Tim En

INTRODUCTION

The Optical Disc Drive is not required to be taken out to have more access to the other components of the laptop.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [Heavy-Duty Spudger](#) (1)
-

Step 1 — Optical Disc Drive

- Remove the single 3/16" screw with the Phillips #0 Screwdriver that secures the Optical Drive.

Step 2

- Slightly wiggle the Optical Drive from the laptop using the Heavy Duty Spudger.

Step 3

- Using your hands, gently slide the Optical Drive out of the slot.
- Set the Optical Drive in a safe designated area.

To reassemble your device, follow these instructions in reverse order.
