

Lenovo IdeaTab A2109 Camera Assembly Replacement

Replace the front and rear cameras in your Lenovo IdeaTab A2109.

Written By: Abigail Bertholf

INTRODUCTION

Use this guide to replace the front and rear cameras.

TOOLS:

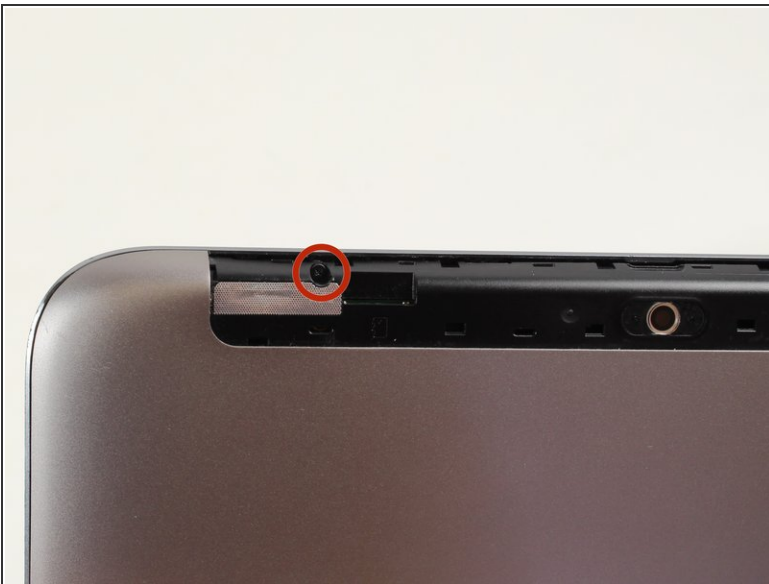

- [Tweezers](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Camera Assembly

- Look at the back of the tablet and locate the speakers on top of the rear cover.
- Locate the small indentation in the plastic cover that runs across the top of the device.
- Wedge the plastic opening tool in this indentation, under the middle of the cover as shown.
- Pry up and push to remove the cover.

Step 2

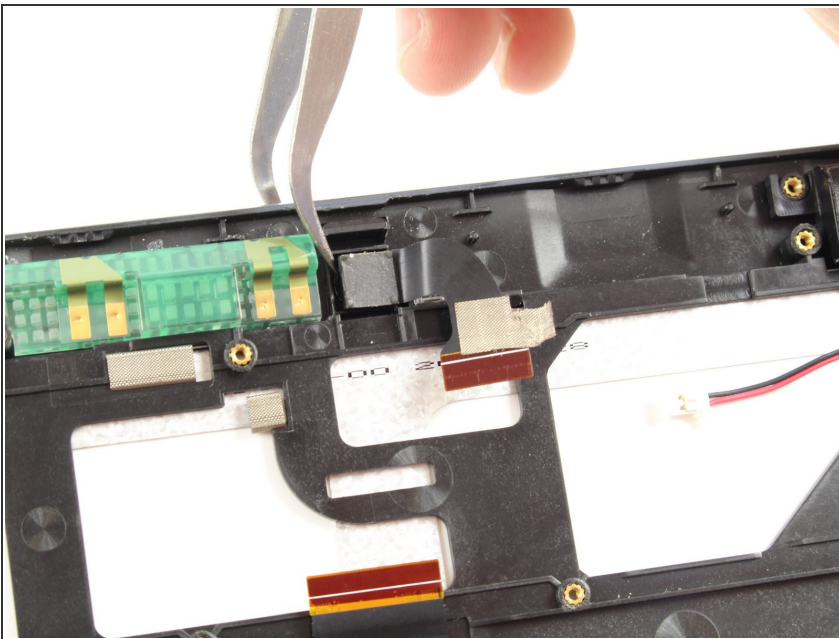

- Remove the following two screws:
 - M3.0 x 3.0 mm #00 phillips screws (black)

Step 3

- Pry open the front and rear faces using a plastic opening tool.
 - ❗ It may take a little force to separate the front and rear faces of the device.
- Slide the plastic opening tool to one corner.
- Place another plastic opening tool into the gap and slide it to the opposite corner as shown.
- Pull the rear cover up and back to separate it from front face of the device.

Step 4

- Slide the rear camera ribbon from the system board.
- Pull up on the black plastic lock on the system board for the front camera and slide the ribbon out.
- Now, you are ready to remove the front and rear facing cameras.

To reassemble your device, follow these instructions in reverse order.
