TOOLS:

- [iFixit Opening Tools](#) (1)
- [Heat Gun](#) (1)

PARTS:

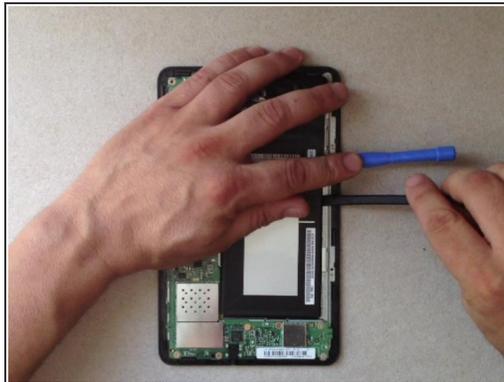

- [Adhesive tape 3M core 5mm](#) (1)
- [touch](#) (1)

Step 1 — Touch Screen replacement

- Switch-off the tablet.
- By using a plastic tool open the back / battery cover.

Step 2

- Disconnect and remove the battery.

Step 3

- Disconnect the LCD display flex cable.
- Disconnect the touchscreen flex cable.
- Disconnect and remove the loudspeaker.
- Unscrew 10x screws.
- Now you can remove the mother board

Step 4

- Remove the metal LCD display shield.

Step 5 — Separate the LCD panel from the digitizer

- There are many clips holding the LCD panel to the metal frame.
- Use a spudger to loosen the clips holding the LCD display.

Step 6

- Heat the touch screen.
- Use a cutter only to start detachment the touchscreen. Then continue with a plastic tool.

Step 7

- After separation the touchscreen from the front bezel, remove the LCD display frame.
- This spare part have a double sided adhesive tape. Otherwise you should place.
