

IBM ThinkPad T42 Keyboard and Trackpad Replacement

Written By: Austin Kidd

TOOLS:

Phillips #0 Screwdriver (1)

Step 1 — Bottom cover

- Using a Phillips #0 screwdriver, identify and unscrew the twenty screws located on the underside of the T42.

Step 2 — Rear screws

- Unscrew the four Phillips screws located on either side of the rear of the T42 (there are two located on each end.)

Step 3 — Keyboard and Trackpad

- Flip the laptop over and open the screen to access the keyboard and trackpad.
- ⓘ The keyboard and trackpad are connected to the motherboard. Before removing the keyboard and trackpad, disconnect both components from the motherboard, as shown in the following step.

⚠ The bezel and keyboard will be loose, be careful.

Step 4

- Carefully maneuver the palm rest away from the keyboard, as both the keyboard and palm rest/trackpad will come off together.
- ⚠ Remember, both the keyboard and trackpad have connectors to the motherboard. Disconnect these before completely removing either component.

To reassemble your device, follow these instructions in reverse order.
