INTRODUCTION

If the rear facing camera has become nonfunctional, it may be replaced. To check if the back facing camera is faulty, open the camera application. If the screen does not display an image when the camera application is opened, then it is likely responsible and faulty. It may be replaced by following this step-by-step guide.

🔧 TOOLS:

- T4 Torx Screwdriver (1)
- Spudger (1)
- Tweezers (1)
- iFixit Opening Tools (1)

## Step 1 — Back Cover

- Use the spudger to pry the back cover off.

Step 2 — Removing Battery

- Use spudger tool to pry under the battery to lift it up and out.

Step 3 — Remove 8 Torx Screws

- Remove eight 8.3mm T4 screws with the Torx screwdriver.

Step 4 — Prying Off Rear Panel

- Pry the back panel of the screen using the plastic opener.

- Work your way gently around the device, using picks as necessary to keep the back panel separated.

- ⚠ Use caution not to damage the device, as it takes force to remove the rear panel.
