Step 3

- Remove the thirteen Tri-Wing Y00 screws (Upper & Lower screws are 5 mm length, middle screws are 3.8 mm length) from the back case.

- Disconnect the cable near the volume buttons.

Step 4

- Use the small plastic opening tool to pry between the screen and the rear case.

Step 5 — Fingerprint Sensor

- Use Tweezers to disconnect the ribbon cable connecting the fingerprint sensor to the motherboard.

- When replacing the fingerprint sensor, make sure the ribbon cable snaps into the port on the motherboard.

To reassemble your device, follow these instructions in reverse order.
