Step 1 — Battery

- Remove the speaker screens by working them loose with a plastic opening tool. You may need to first loosen them with tweezers or a craft knife.
- ⚠ These screens are held in place by glue that is hard to remove. Please take your time to ensure that that this step is done correctly.

Step 2

- Remove the screws from both of the spots that were covered.
Step 3

⚠ DO NOT USE A METAL TOOL FOR THIS.

● Go all around the casing, prying the screen away from the backing with the spudger.

● It will make a popping sound each time one of the lock tabs is disconnected.

ⓘ Take your time as you move all around the device when prying the backing off.

Step 4

● Pull off the plastic that is covering the battery cable.

Step 5

- Using either the plastic opening tool or your fingers, gently pull on both sides of the plug to release it.
Step 6

- Remove the battery by grabbing the tab shown and pulling up.

- The battery is held to the device by adhesive. Pull the battery up from the tab and it will lift out with a bit of effort.

Step 7 — Speakers

- The speakers are connected to the tablet by glue and require a lot of prying to remove.

- Make sure to get all the way under the speakers when prying.

Step 8

- ⓘ **This step is not necessary if you aren't replacing the speakers.**

- To the remove the wires heat the solder connecting the wires to the board, and gently pull on the wires.

- ⓘ Remember the placement of the red and black wires.

- Connect new speakers by soldering the wires onto the board.
