

SodaStream Fountain Jet A200 Spring Replacement

In the guide, the user will see how to replace a spring located underneath the carbonation button.

Written By: Katie Feters

INTRODUCTION

This guide will be used to instruct a person how to replace the spring that controls the up and down motion of the carbonation button should it become worn over time.

Step 1 — removing back cover

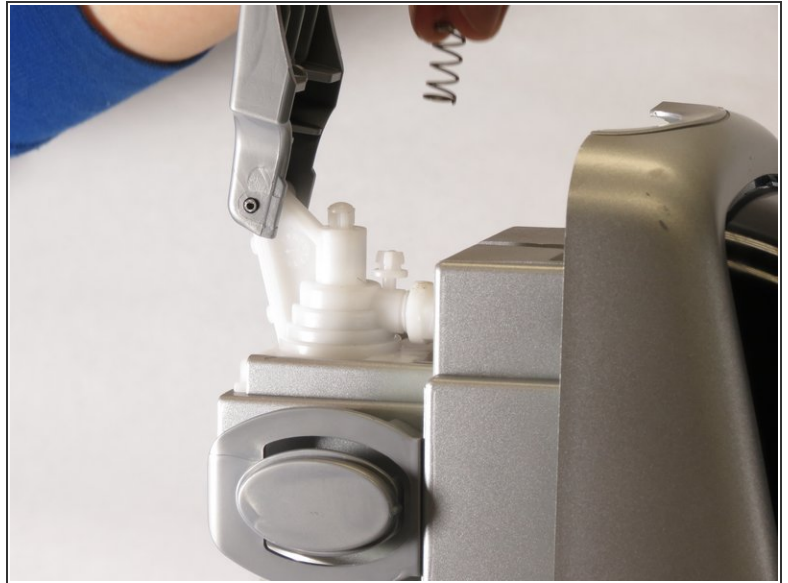

- Press in the two gray buttons found on either side, at the top of the machine.
- Pull back on the cover until it releases from the device and pull the back off.

Step 2 — Carbonation button

- Place your hand under the carbonation button and gently pull up and away from you, towards the back of the machine.

Step 3 — spring removal

- Remove the spring located under the carbonation button.
- Replace with the new spring, by lining it up and pushing it down.

To reassemble your device, follow these instructions in reverse order.
