## **INTRODUCTION**

The A/C Power Adapter enables the projector to be on continuously. Replacing this item could fix a malfunctioning projector.

#### Step 1 — A/C Power Adapter

 To access the A/C Power Adapter connection, remove the battery cover, located on the back of the clock.

#### **Step 2** — Battery Compartment Cover

 To remove the battery compartment cover, slide the cover up towards the top of the clock while applying slight pressure.

#### **Step 3 — A/C Power Adapter Socket**

 Gently pull the A/C Power Adapter from the socket, to the left of the batteries.

#### Step 4 — A/C Power Adapter Tip

- To plug in the A/C Power Adapter, insert the tip into the socket, located to the left of the batteries, and press firmly.
- Be sure that you are inserting an A/C Power Adapter and not a D/C Power Adapter. Inserting the improper cord could cause damage to the device.

### **Step 5** — A/C Power Adapter Cord

 Once the A/C Power Adapter tip is inserted in the socket, guide the cord through a notch directly below.

To reassemble your device, follow these instructions in reverse order.
