

Crayola Crayon Maker Sliding Lock Mechanism Replacement

Clear plastic sliding lock mechanism can become dislodged from proper location. This causes the device's lid not to lock.

INTRODUCTION

If lid is closing but not latching, read the instructions in this guide to help you determine and fix the problem.

TOOLS:

- [Phillips #2 Screwdriver](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Take out the melting tray that is out of place.

- Press the green arm away from the melting tray. Remove the melting tray.
- Pop the metal arms out of the green pivot support.

Step 2 — Remove the metal melting tray.

- Remove the 2 screws (.75cm in length) currently securing the metal melting tray with a Phillips #2 screwdriver.

Step 3 — Remove the light bulb

- The light bulb should now be revealed. Unscrew the burned out bulb and replace with a new bulb.

Step 4 — Remove the green base from the crayon maker

- Flip the crayon maker.
- Remove six screws (2 cm in length) with a spanner.
- Remove the green base plate and set it aside.

Step 5 — Locate the Plastic arm

- Locate the clear plastic arm inside the control box.

Step 6 — Adjust/Replace the Plastic Arm

- If necessary, unscrew the plastic arm with a Phillips #00 Precision screwdriver and readjust the arm until the desired position is reached.
- If the plastic arm is broken, contact Crayola for replacement parts.

To reassemble your device, follow these instructions in reverse order.
