INTRODUCTION

This guide will teach you how to remove and replace the rear cover of a Mad Catz Dual Force 2 Pro controller. If you need to repair the controller or access the internals of your controller you will need to remove the rear cover.

TOOLS:

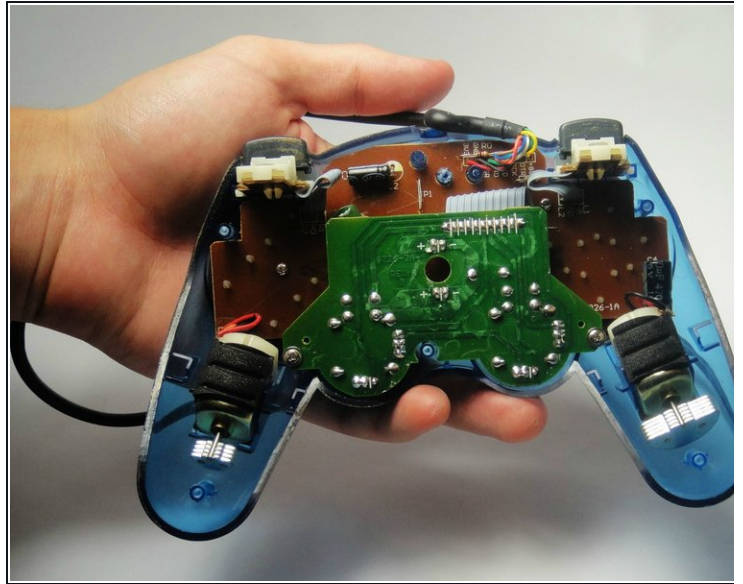

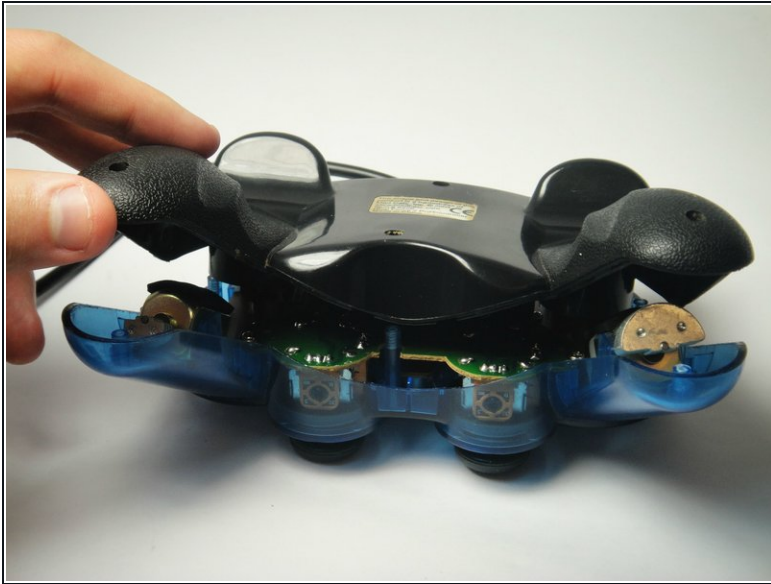

Phillips #1 Screwdriver (1)

Step 1 — Remove the Screws

- Using the Phillips #1 screwdriver, remove the six 7 mm screws from the rear cover.

Step 2

- After removing the screws, you will be able to lift the rear cover of the controller.
- ⓘ There are no loose items in the controller that can fall out, so you can open it without extreme caution.

To reassemble your device, follow these instructions in reverse order.
