Nikon Coolpix L810 Flash Replacement

Replace the flash from your Nikon Coolpix L810.

Written By: Emilio Mena

INTRODUCTION

Is your flash not lighting up? This guide will show you how to replace the flash from your camera.

🔧 TOOLS:

- [Phillips #000 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Soldering Iron](#) (1)

Step 1 — Flash

- Remove two 5 mm Phillips #000 screws below the flash component.

- (i) In order to complete this step the flash must be open. To open the flash press the button located above the lens on the leftward side of the camera.

Step 2

- Use blue plastic opening tool to pry open the casing for the flash.

Step 3

- Remove the plastic casing surrounding the flash.

Step 4

- Pull the wires connecting the flash out of the camera.

Step 5

- Unsolder the wires that connect the flash component.

To reassemble your device, follow these instructions in reverse order.
