# INTRODUCTION

This guide will provide instructions on how to replace the speakers in your IdeaTab S2109A-F.

---

## TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tool](#) (1)
-

## Step 1 — Battery

**⚠ Turn the tablet off before beginning this guide. It is dangerous to touch internal components while the tablet is on.**

- Place the tablet on its screen and use the opening tool to remove the back cover.
- With the tool, place slight pressure on the tablet to pry the back panel off.

## Step 2

- Grab the battery and gently lift upwards. This will show a red and black coiled wire.
- Pull the battery gently until the cord has no slack.

## Step 3

- Carefully hold the battery in one hand while your other hand's index finger and thumb grab the two wires nearest to their connection point.
- Use your fingers to give a firm tug to the black and red wires, but do not yank them hard enough to damage the tablet.
- Remove the battery from the device.

## Step 4 — Speaker

- Remove the ten 2 mm black screws from the edges of the system board with a Phillips #00 screwdriver.

## Step 5

- Disconnect the gold connector by lifting the latch with the plastic opening tool.

## Step 6

- Pull up on the L-shaped board.
- The bottom and top connection points should disconnect.

## Step 7

- Remove the seven 2 mm black screws connecting the speakers using the Phillips #00 screwdriver.

## Step 8

- Lift the disconnected speakers from their resting position.
- Grab the red and black cable with your index finger and thumb.

## Step 9

- Pull up on the connection to disconnect the speakers.

To reassemble your device, follow these instructions in reverse order.
