

HP Pavilion DM3-3010US Hard Drive Replacement

How to replace the hard drive

Written By: Somesh Rai

INTRODUCTION

Hard drives are prone to failure, causing computer files to become inaccessible. This guide will explain how to replace a defective hard drive in the HP Pavilion DM3-3010US.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

PARTS:

- [2.5" SATA Hard Drive](#) (1)

Step 1 — Hard Drive

- Flip laptop over to back with the battery facing downwards.
- ❗ The battery is the silver cylinder located on the bottom of the laptop.

Step 2

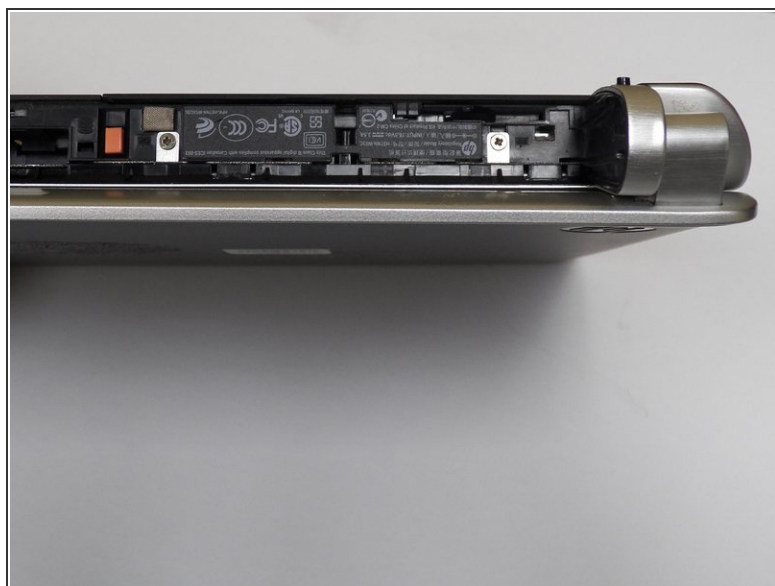

- Locate switch for battery ejection.
- ❗ Battery ejection switch is located just above the left side of the battery.

Step 3

- Remove battery by sliding the battery ejection switch to the right and pulling the battery away from the laptop.

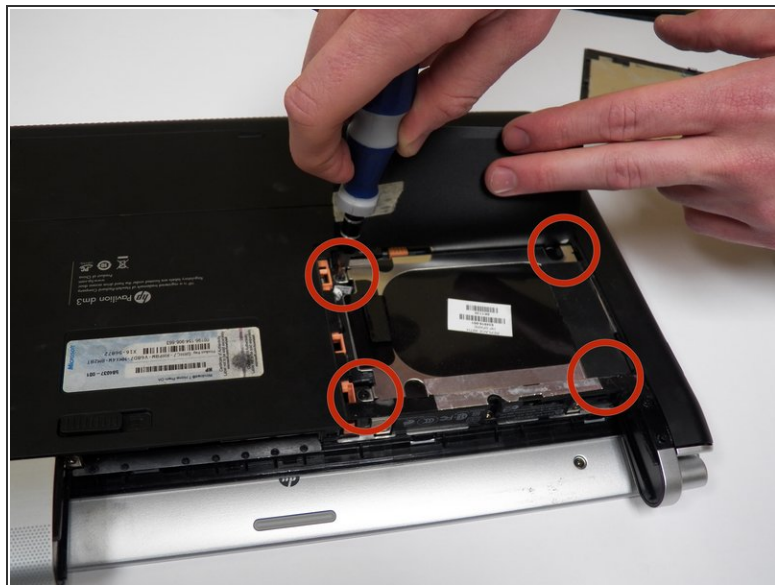

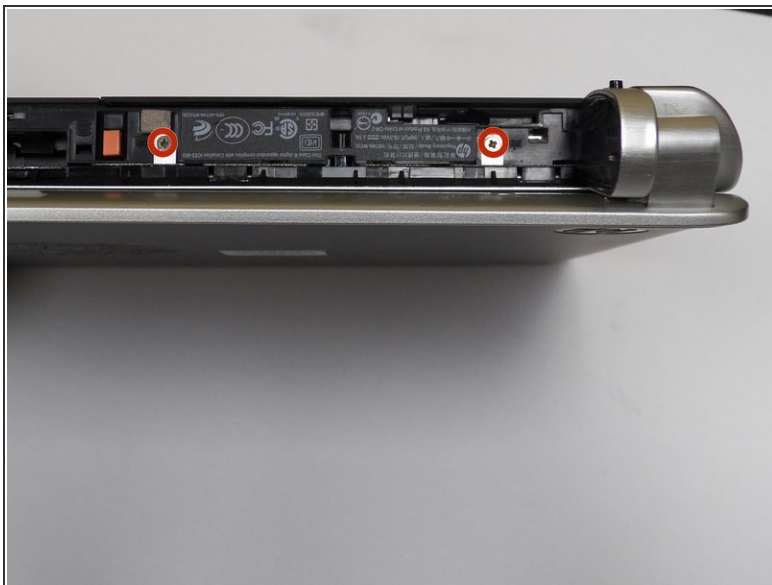

Step 4

- Using a plastic opening tool, remove the large square casing located on the bottom right side of the laptop.

 The hard drive will be visible once the casing has been removed.

Step 5

- Using a Phillips #0 Screwdriver, remove each of the six Phillips #0 screws.
- ❗ Four screws are located on each corner of the hard-drive.
- ❗ Two screws are located on the right side of the battery slot.

Step 6

- Remove old hard drive from its slot and replace with new hard drive, sticker side facing up.

To reassemble your device, follow these instructions in reverse order.
