-

Step 1 — Identifying Earpiece

- Locate the left side designation on the headband-earpiece junction.
- The battery is in the right earpiece.
- The motherboard is in the left earpiece.

Step 2 — Ear Cushion Removal

- Gently pull around the perimeter of the left ear cushion until it comes off.

Step 3 — Outer Ear Rim Removal

- Use the PH00 Screwdriver to remove the three Phillips 6mm screws around the perimeter of the ear cup.
- Gently pull the outer ear rim off of the headset assembly.

⚠ Harsh removal may cause permanent damage to the speaker wires.

Step 4 — Remove Speaker Housing

- Using tweezers, gently pry the red and black speaker wires from the attached socket.

Step 5 — Remove Battery

- Lift up battery and disconnect wires using tweezers.
- Use a new battery for reconstruction.

To reassemble your device, follow these instructions in reverse order.
