Panasonic Lumix DMC-ZS8 Screen Panel Replacement

We will be disassembling the necessary parts of the camera so we can replace the screen panel.

Written By: Trevor Meyers

INTRODUCTION

This guide will show you how to remove all of the exterior panels of the camera in order to remove and replace the LCD screen panel.

🔧 TOOLS:

- Mahi Driver Kit - 48 Bit Driver Kit (1)

## Step 1 — Screen Panel

- Remove all four screws from the side panels.
Step 2

- Remove the two screws from the bottom of the back panel.

- Remove the back panel as shown in the second and third pictures.

Step 3

- Remove the screen from the mounting bracket.

- Slide the wiring from the board connection.

Step 4

- Reconnect the new screen wiring into the motherboard as shown in the picture. Replace the new screen into the mounting bracket.

Step 5

- Replace the front panel and install the screws on the bottom side of the camera.

Step 6

- Replace the side panels and replace the four screws to secure the side panels.

Step 7

- This is what your newly replaced screen should look like.

Now you have a new screen for your Panasonic DMC-ZS8.
